

DIABASS[®]

Version 6

Supported devices/Compatibility list

DIABASS

Build:23.7.0.1

Date:11.07.2023

blood glucose meters

The following blood glucose meters are supported.

Unless otherwise specified, the data transfer cable provided by the manufacturer is required.

ABBOTT

	Name	Note
	FreeStyle Optium Neo	
	FreeStyle Precision Neo	
	FreeStyle InsulinX	
	FreeStyle Freedom Lite	
	FreeStyle Lite	
	FreeStyle Freedom	
	FreeStyle Papillon Mini

ACCU-CHEK

	Name	Note
	Accu-Chek Instant S	
	Accu-Chek Instant	
	Accu-Chek Performa Connect	The Accu-Chek SmartPix V2 interface is required for data transfer.
	Accu-Chek Guide	
	Accu-Chek Aviva Insight Diabetes-Manager	The Accu-Chek SmartPix V2 interface is required for data transfer.
	Accu-Chek Aviva Connect	

	Accu-Chek Aviva (2014)	The Accu-Chek SmartPix interface is required for data transfer.
	Accu-Chek Aviva Expert	The Accu-Chek SmartPix interface is required for data transfer.
	Accu-Chek Mobile U1	
	Accu-Chek Aviva Combo	The Accu-Chek SmartPix interface is required for data transfer.
	Accu-Chek Aviva Nano	The Accu-Chek SmartPix interface is required for data transfer.
	Accu-Chek Mobile	The Accu-Chek SmartPix interface is required for data transfer.
	Accu-Chek Voicemate	The Accu-Chek SmartPix interface is required for data transfer.
	Accu-Chek Performa	The Accu-Chek SmartPix interface is required for data transfer.
	Accu-Chek Compact Plus	The Accu-Chek SmartPix interface is required for data transfer.
	Accu-Chek Aviva	The Accu-Chek SmartPix interface is required for data transfer.
	Accu-Chek Sensor	The Accu-Chek SmartPix interface is required for data transfer.
	Accu-Chek Go	The Accu-Chek SmartPix interface is required for data transfer.
	Accu-Chek Active	The Accu-Chek SmartPix interface is required for data transfer.
	Accu-Chek Compact	The Accu-Chek SmartPix interface is required for data transfer.
	Accu-Chek Complete	The Accu-Chek SmartPix interface is required for data transfer.

Insulin pumps

The following insulin pumps are supported.

Unless otherwise specified, the data transfer cable provided by the manufacturer is required.

ACCU-CHEK

	Name	Note
	Accu-Chek Solo Diabetes-Manager	
	Accu-Chek Insight	The Accu-Chek SmartPix V2 interface is required for data transfer.
	Accu-Chek Spirit Combo	The Accu-Chek SmartPix interface is required for data transfer.
	Accu-Chek H-Tron	The Accu-Chek SmartPix interface is required for data transfer.
	Accu-Chek D-Tron	The Accu-Chek SmartPix interface is required for data transfer.
	Accu-Chek Spirit	The Accu-Chek SmartPix interface is required for data transfer.

INSULET

	Name	Note
	Omnipod Dash	
	Omnipod	

MEDTRONIC

	Name	Note
	Medtronic 780G	The manufacturer does not allow you to use data protection-compliant import with DIABASS. The patient data must therefore first be transferred to a cloud (Carelink) provided by the manufacturer; from there data can be exported to DIABASS.
	Medtronic 670G	The manufacturer does not allow you to use data protection-compliant import with DIABASS. The patient data must therefore first be transferred to a cloud (Carelink) provided by the manufacturer; from there data can be exported to DIABASS.
	Medtronic 640G	The manufacturer does not allow you to use data protection-compliant import with DIABASS. The patient data must therefore first be transferred to a cloud (Carelink) provided by the manufacturer; from there data can be exported to DIABASS.

MENARINI

	Name	Note
	Glucomen DayPump	

SOOIL

	Name	Note
	DanaRS	Via file import from the manufacturer software/app or via DIABASS SecureSend
	Dana R	The BlueTooth dongle provided by the manufacturer is required for data transfer.

TANDEM

	Name	Note
	t-slim:x2	The manufacturer does not allow you to use data protection-compliant import with DIABASS. The patient data must therefore first be transferred to a cloud (Tidepool, Diasend/Glooko) provided by the manufacturer; from there data can be exported to DIABASS.

WELLION

	Name	Note
	Wellion Micro-Pump	

YPSOMED

	Name	Note
	mylife YpsoPump	The BlueTooth dongle provided by the manufacturer is required for data transfer.
	mylife Omnipod	

CGM/FGM

The following CGM/FGM systems are supported.

Unless otherwise specified, the data transfer cable provided by the manufacturer is required.

ABBOTT

	Name	Note
	FreeStyle Libre 3	The manufacturer does not allow you to use data protection-compliant import with DIABASS. The patient data must therefore first be transferred to a cloud (LibreView) provided by the manufacturer; from there data can be exported to DIABASS.
	FreeStyle Libre2	The software 'FreeStyleLibre Software' is required for data transfer.
	FreeStyle Libre	

ASCENSIA

	Name	Note
	Eversense E3	

DEXCOM

	Name	Note
	Dexcom G7	The manufacturer does not allow you to use data protection-compliant import with DIABASS. The patient data must therefore first be transferred to a cloud (Clarity) provided by the manufacturer; from there data can be exported to DIABASS.
	Dexcom G5	The manufacturer does not allow you to use data protection-compliant import with DIABASS. The patient data must therefore first be transferred to a cloud (Clarity) provided by the manufacturer; from there data can be exported to DIABASS.
	Dexcom G4	

MEDTRONIC

	Name	Note
	Medtronic 780G	The manufacturer does not allow you to use data protection-compliant import with DIABASS. The patient data must therefore first be transferred to a cloud (Carelink) provided by the manufacturer; from there data can be exported to DIABASS.
	Medtronic 670G	The manufacturer does not allow you to use data protection-compliant import with DIABASS. The patient data must therefore first be transferred to a cloud (Carelink) provided by the manufacturer; from there data can be exported to DIABASS.
	Medtronic 640G	The manufacturer does not allow you to use data protection-compliant import with DIABASS. The patient data must therefore first be transferred to a cloud (Carelink) provided by the manufacturer; from there data can be exported to DIABASS.
